

**Notice and Acknowledgment of Confined Space Requirements and
Waiver of Claims**

The Snyderville Basin Water Reclamation District (the "District"), requires that all Contractors entering confined spaces that are a part of the District's existing wastewater collection system acknowledge compliance with requirements of US Department of Labor OSHA Federal Regulation 29 CFR 1926 Subpart AA, Confined Spaces in Construction.

The District hereby advises the Contractor that all gravity sewer lines and manholes, low pressure sewer valve vaults and flushing manholes, sewer force main valve vaults, wastewater pump station wet wells and other similar structures and features on the District's wastewater collection system and treatment facilities qualify as confined spaces according to the Federal Regulation.

By executing this document, the Contractor named below hereby acknowledges that the District has advised the contractor of the confined spaces on the District's wastewater collection system and has provided or made available to Contractor a copy of US Department of Labor OSHA Federal Regulation 29 CFR 1926 Subpart AA, Confined Spaces in Construction. Contractor confirms that they have read, understand and will comply with the requirements of the federal regulation.

The Contractor hereby waives and relinquishes any claims or causes of action against the District or any District personnel based on the Contractor's breach of or failure to comply with the terms, conditions and representations set forth herein.
